

Manage Your Inventory Efficiently

Fortis

Get organized. Get automated. Get Inventory.

Inventory Features

Manage Products and Services

Scan and upload new products. Search and find products/services by name, image, SKU, or barcode.

Ordering Made Easy

Track and sell inventory anywhere, anytime outside of the office by using Inventory's mobile app (iOS and Android).

Transaction and Tax Reporting

Customize, filter and monitor transaction and tax reporting and auto-calculate monthly/yearly sales tax.

Product Marketplace

Pre-populated product marketplace with many of the products you already sell. Simply search the marketplace to add products to your inventory.

Inventory Control

Know exactly when it's time to reorder with customized notification alerts to ensure complete control of your inventory levels.

Seamless Transactions

Easily process cash or credit card transactions. Securely store cards on file for patients. Refund items and add them back into stock.

Quote Generator

Generate detailed quotes for products and services to print or email directly to patients. Create custom quote templates for products, services, or bundles.

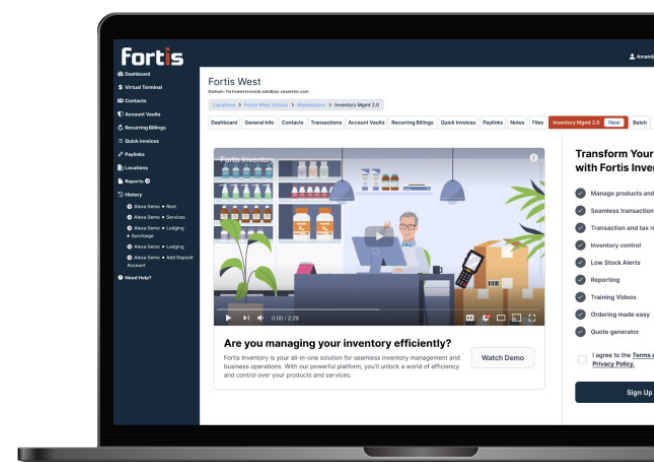

Discounts and Bundles

Mark items as complimentary or free, bundle items with custom pricing, and apply discounts at checkout for one-time or custom date ranges.

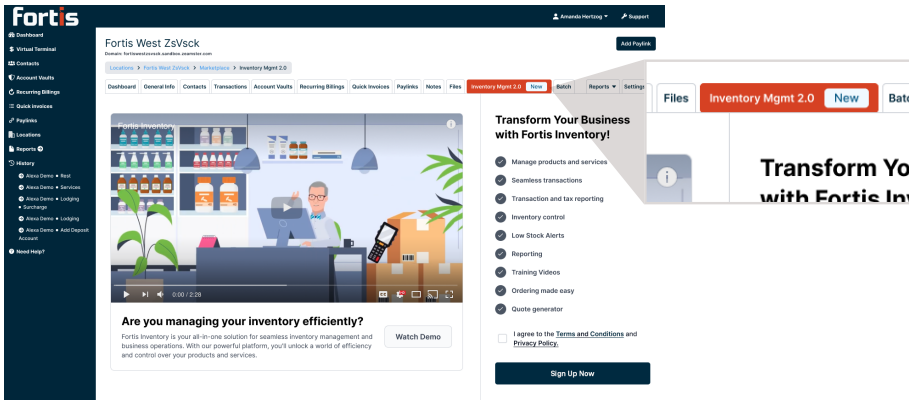

Take control of your inventory!
