

CLICK-TO-PAY

for NetSuite

Bring accounts receivable into the modern age! Click-to-Pay for NetSuite adds a Pay Now link to quotes and invoices created in NetSuite, speeding up bill payment. With an embedded payment link or button, it is easy for customers to click to pay using their preferred payment method including ACH, Visa, Mastercard, American Express, Discover and UnionPay. The result? Faster receivables, more visibility into your cash flow, and more peace of mind.

- **Generate invoices and quotes within NetSuite as usual, with your payment link automatically included**
- **Reduce Days Sales Outstanding (DSO) and improve cash flow by providing customers with easier ways to pay**
- **Reconcile all card payments and ACH transactions in NetSuite automatically after a customer makes a payment**

Let's get started

This feature is already included in your NetSuite bundle, so activating is simple! Give us a call or email us at NetSuite@fortispay.com for details and start accelerating payments today!
