SuiteEssentials
For NetSuite

fortis + ORACLE NetSuite

Fortis makes it easier to improve time to revenue, reduce costs and broaden your market with Suite-Essentials – a comprehensive collection of features and functionality. As an integrated NetSuite partner for nearly 20 years, our end-to-end payment platform offers flexible and secure payment processing for your growing business.

Accelerate Revenue Recognition

Paylink
Enable your customers to self-pay online from any invoice or quote created within NetSuite.

Recurring Payments
Automatically accept customer payments at predefined intervals. Some might refer to this as 'subscription billing'.

Surcharge
Add up to a 3% fee to the transaction amount at the point of sale to offset your processing costs.

Quick Invoice
Consolidate multiple invoices and enable customers to make full or partial payments from one invoice.

Tokenization
Speed up future payments by securely storing a unique identifier in place of a credit card number.

Increase Productivity

Automated Reconciliation
Reconcile bank deposits with transactions right in NetSuite, saving hours of manual work.

Cost-Saving Options
Lower processing fees by leveraging Level II/ Level III processing on eligible transactions and surcharging.

Account Updater
Simplify your business processes and reduce declined payments by automatically updating cards on file.

Ultra-Secure Processing
Transactions protected with 3D Secure (3DS), a security protocol that adds an extra layer of security for online credit/debit transactions.

Extensive Support
Unlike many other providers who bill per month for NetSuite support, our product and tech support are included.

Are you ready to transform the way you manage payments?

Contact Fortis to discover how our solutions can revolutionize your NetSuite operations.
