

Easily Accept Payments Within Your WooCommerce Store

An all-in-one solution to manage your business.

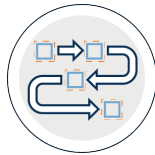

WooCommerce and Fortis have partnered to provide users with an integrated payment acceptance solution to help lower costs and improve your workflow through the Fortis WooCommerce plugin.

Features

Seamless Integration

The Fortis and WooCommerce integration allows you to collect payments and manage operations all from one place.

Quick Onboarding

Minimize interruptions with seamless setup, and installation so you can allocate more time to your business.

Transparent Pricing

Choose from pricing options that work best for your business without worrying about hidden fees or long-term contracts.

Easy Acceptance

Accept multiple payment types from your customers easily and securely including credit, debit, ACH, and more.

Level 2 & 3 Data Enrichment

Qualify for lower B2B processing costs and send detailed, line-itemized data back to customers who pay with government-issued cards.

Quick Invoicing

Generate quotes, request and track payments, and more with digital invoicing options that help you get paid faster.

Start accepting payments within your WooCommerce store and sign up with Fortis today!
